

Fungi

Being a very dry place for much of the year, only a few fungi have been observed within Vistoso Trails.

In this guidebook:

- Saltshaker Stiltball (Page 150)
- Agaricus (Page 150)
- Green-spored Parasol (Page 151)

Common name: Saltshaker Stiltball

Scientific name: *Battarreoides diguetii*

Notes: Observed away from the trails, near a wash.

Photo credit: Travis Brungraber

Common name: Agaricus

Scientific name: Genus *Agaricus*

Notes: A sample was collected and is awaiting sequencing at a lab in Arizona.

Common name: Green-spored Parasol

Scientific name: *Chlorophyllum molybdites*

Notes: Observed growing on an irrigated lawn adjacent to the preserve.
